Summary

As a software engineer focused on development, I have a strong desire to expand my knowledge in new technologies. I leverage my technical expertise and interpersonal skills to optimize my performance in collaborative environments. My ability to quickly adapt to different settings and technologies allows me to seamlessly integrate into dynamic and ever-changing projects.

I have participated in the development of software tools, such as the recurring subscription system, which optimized the process, and the tool maintenance system that efficiently managed scheduled maintenance. These experiences have provided me with a solid technical foundation and key interpersonal skills. Driven by innovation and continuous learning, I am prepared to make valuable contributions to the field of software engineering.

Education

Information Systems Engineer | National University of Costa Rica

- Information Systems Engineering Technician (2023)
- Bachelor's Degree in Information Systems Engineering (Expected 2024)

Skills

- Soft Skills: Adaptability, continuous learning ability, critical thinking, teamwork, problem-solving.
- Languages: PHP, Python, SQL, JavaScript.
- Tools: VSCode, MySQL, Postman, GitHub, Docker, Vue.js, Laravel.

Languages

- Spanish: Native
- English: Intermediate

Work Experience

Full-Stack Developer Intern at ULTRAPARK

March 2024 – June 2024

- Designed and developed web applications using technologies such as Laravel, Vue.js, and SQL, while managing version control with GitHub. Implemented programming practices and database standards to ensure efficiency, security, and reliability of platforms.
- Contributed to customer satisfaction by optimizing the user experience in scheduled maintenance management, collaborating in the design and implementation of essential modules.
- Demonstrated effective skills in collaborative and results-oriented environments, promoting teamwork to achieve shared goals.

Full-Stack Developer Intern at FUNDATEC

February 2022 – June 2023

- Established close collaboration with clients to deeply understand their needs and translate them into specific functional and technical requirements.
- Analyzed interface usability, identifying and resolving user obstacles using Nielsen's heuristics. This resulted in increased customer satisfaction, evidencing a smoother and more satisfying user experience.
- Applied my expertise in frontend and backend languages to seek and implement comprehensive web solutions. The implementation of SCRUM methodology allowed effective project management and timely deliveries, ensuring deadlines were met.

Certifications

- Scrum Fundamentals Certification by SCRUM Study.
